

Lillevilla

The paper used in this brochure has been awarded the Good Environmental Choice Label Set by the Swedish Society for Nature Conservation.

A Lillevilla cabin kit is a complete package containing the materials needed to make a superb building, from logs to roofing felt, all pre-prepared and ready for assembly:

- Timber Joists
- Wall logs
- Floorboards
- Ready-made doors, glazed and fitted to the frames
- Pre-assembled gables
- Ridge-beam
- Roof boards
- Pre-cut boards and battens
- Corner fillets and wall-battens
- Roofing: type according to the model
- All needed screws, nuts & bolts, nails and hinges
- Comprehensive assembly instructions

Lillevilla packages are designed to be easy to deliver, store and handle.

Lillevilla 110 Exclusive

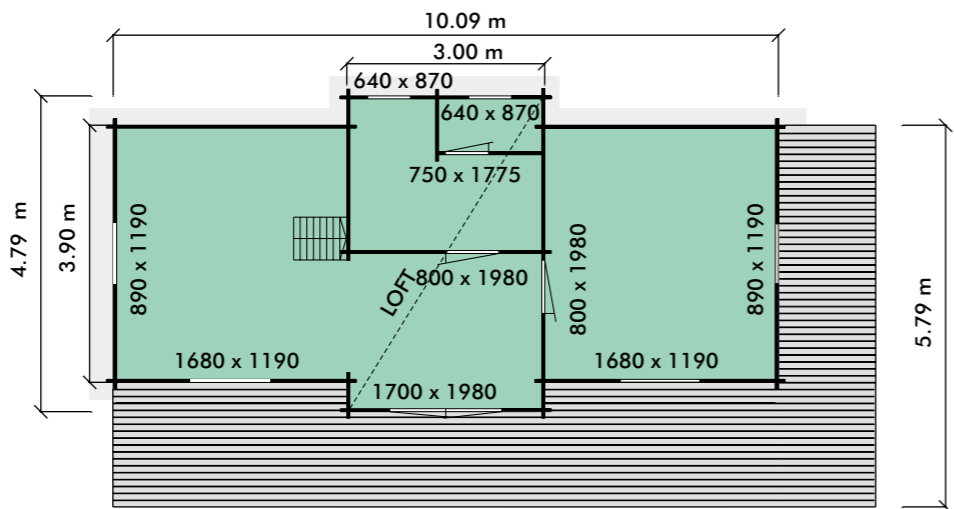

Truly miraculous space for those who demand more at a reasonable price.

Like our other cabins & houses, Lillevilla 110 Exclusive was developed in close co-operation with customers and gives complete versatility in all situations. Enjoy it as, for example

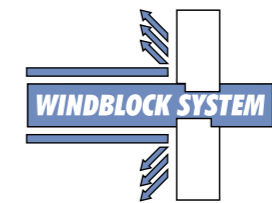

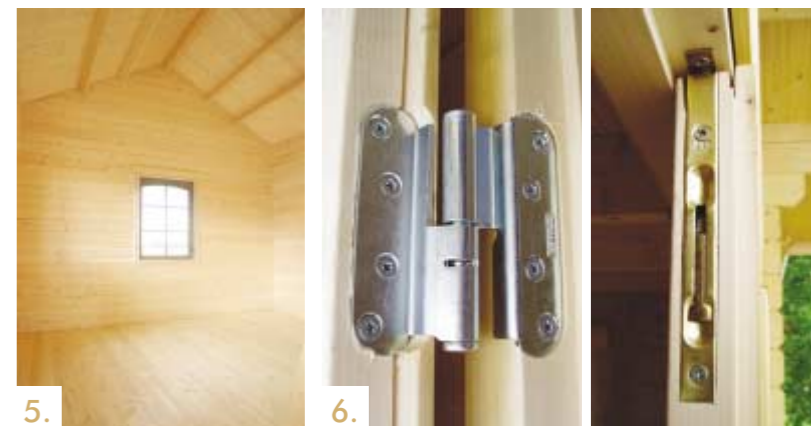

- Home Office
- Summer Cottage
- Guest Accommodation
- Occasional Dwelling

or for whatever need you have for high-quality living space.

Living space	40,7 m ²
Loft space	11,0 m ²
Terrace	21,0 m ² (Optional)
Double door	1.700 x 1.980 mm
2 Inner doors	890 x 1.980 mm
Small room door	750 x 1.775 mm
2 Big Double windows in front	1.680 x 1.190 mm
2 Gable windows with mosquito netting	890 x 1.190 mm
2 Small room windows	640 x 870 mm
2 Loft space windows	640 x 640 mm

1. The 11m² loft gives wonderful sleeping or storage space. The handy moveable stairs are included as standard at no extra cost.
2. Windows give a light, airy feel to the loft.
- 3 and 5. With 2.25m side-walls and a centre-ridge height of 3.82m there is space for all.
4. All the windows are double-glazed in THERMO-Glass, and the gable windows come fitted with mosquito nets.
6. Strong hinges are fitted to the 1.98m outer door.

Windblock System
All models have a corner construction that is guaranteed to be draught-proof.

Log strength

Lillevilla cottages come in a choice of three different log thicknesses: those constructed from the sturdiest sections are ideal for heavy wear, and can perfectly well be used as a small villa, for example.
